The Graduate School of Counseling at George Fox University is pleased to be the home of the Northwest Center for Play Therapy Studies (NWCPTS). Under the direction of Dr. Daniel Sweeney, the NWCPTS is the largest university-based center focused on the study and promotion of play therapy in the northwest United States.

The mission of the Northwest Center for Play Therapy Studies is to promote the healthy development and welfare of children and families through the process of play and filial therapy. In support of the relational, psychological and spiritual wholeness of children and families, the center seeks to fulfill this objective through the provision of play therapy, training, supervision and learning resources for students and mental health professionals in the community.

I Don’t Want to Talk About It:
Working with Hard-to-Engage Children, Youth and Families

Monday, June 5, 8:30 a.m. – 4 p.m.

Working with difficult-to-engage clients can be frustrating and challenging, even for seasoned clinicians. The challenge of working with younger clients in therapy can be further compounded by their fear of entering therapy, their lack of control over the decision to attend therapy, their feeling of being controlled for family problems, their last experience with traditional treatment, and their developmental capacity, which can make it difficult for them to respond to traditional talk therapy. Working with these clients involves understanding the reasons underlying what has been called “resistance” and engaging them in the therapeutic process. This workshop will outline the factors that underlie engaging hard-to-reach children and families. Participants will learn specific techniques to engage children, adolescents and parents in therapy, and maximize potential for change. Emphasis will be on play-based, expressive arts techniques for use with preschool, school-aged and adolescent clients. This will include therapeutic games, art, music and stories. Strategies for engaging parents in therapy will be outlined, as well as activities for use in child-focused family therapy sessions.

Presenter:
Liana Lowenstein, MSW, RSW, CPT-S is a registered clinical social worker, certified play therapy-supervisor, and certified TF-CBT therapist from Toronto, Canada. She has been working with children and their families since 1988. She presents trainings across North America and abroad. She provides clinical supervision to mental health practitioners, runs a play therapy internship program, and consults to several mental health agencies. She has authored numerous books, including Paper Dolls and Paper Airplanes: Therapeutic Exercise For Sexually Traumatized Children; Creative Interventions for Bereaved Children; Creative Interventions for Children of Divorce; Creative CBT Interventions for Children with Anxiety and Cory Helps Kids Cope with Sexual Abuse. She is a winner of the Monica Herbert Award for outstanding contribution to therapy practice in Canada.

Aggression and Death in the Playroom: A Neurobiological Approach for Integrating Extreme Energy in Play Therapy

Tuesday, June 6, 8:30 a.m. – 4 p.m.

During intense, aggressive play-therapy sessions, therapists are involved in play that may leave them feeling overwhelmed. Although aggression and death are common in play therapy, therapists often lack a clear understanding of how to facilitate its intensity. This may lead to inadvertently promoting aggression and increasing lower-brain dysfunction. It can also contribute to therapists feeling exhausted and lead to compassion fatigue, and may compromise the ability to stay attuned in the therapeutic process. The session will cover the fundamentals of Theraplay®, an attachment-enhancing model of play therapy. It is a treatment model that enhances attachment and trust between children and their parents – focusing on their strengths, thus building self-esteem for both. Theraplay tries to replicate normal parent/child interactions and is applicable to all ages and a wide range of emotional, behavioral and social difficulties. Most frequently, it is used in families where there are relationship and/or attachment difficulties including adopted, foster, stepfamilies, and those within the autistic spectrum. Through lecture, video and experiential activities, this workshop will include Theraplay theory, primary dimensions (structure, engagement, challenge and nurture) and related research. Attendees will have an opportunity to practice some Theraplay activities. Dress comfortably.

Presenter:
Evanengle Munns, PhD, CPlaySych, RPT-S is a certified clinical psychologist, a registered trainer/supervisor with the Theraplay Institute in Chicago, and a registered play therapist-supervisor. She has presented workshops on play therapy across the United States and internationally. In recent years, much of her time has been spent in training and supervising therapists in Theraplay, nondirective and filial play therapy. With more than 40 years of experience working with children and their families, she offers a rich knowledge in the children’s mental health field. Dr. Munns has written numerous articles on Theraplay and has edited two books: Theraplay: Innovations in Attachment-Enhancing Play Therapy and Applications of Family and Group Play Therapy. She received the Monica Herbert Award from the Canadian Association for Child and Play Therapy (CACP), and is listed by the CACP as one of the five top play therapists in Canada.

Autism Plays:
Play Therapy Strategies and Interventions for Autism Spectrum Disorder

Friday, June 9, 8:30 a.m. – 4:30 p.m.

Participants will explore and experience play therapy interventions and strategies designed to effectively address key struggle areas for children and adolescents with autism spectrum disorder. Evidence-based play therapy practices will be presented along with strengths and limitations of play therapy models. The unique play qualities and play skills deficits typical with children with autism will be highlighted. Several play therapy interventions will be presented, along with case examples and video presentation of play sessions.

Presenter:
Robert Jason Grant, EdD, LPC, RPT-S is a registered play therapist supervisor and certified autism specialist. He operates two Theraplay Clinics in Missouri and specializes in play therapy techniques with children, adolescents, adults and families. He is an international presenter who specializes in working with Autism Spectrum Disorder, neurodevelopmental disorders, and developmental disabilities and is the creator of AutPlayTherapy.com, an autism treatment using play therapy, behavioral therapy and relationship development approaches. Dr. Grant has written five books on the subjects of play therapy, autism and ADHD, including AudPlayTherapy for Children and Adolescents on the Autism Spectrum: A Behavioral Play-Based Approach; Play-Based Interventions for Autism Spectrum Disorder and Other Developmental Disabilities; The Autism Spectrum Disorder Workbook for Children; He is a professional board member for Stars for Autism and is a contributing writer for the Missouri Autism Report.

Helping Attachment-Disordered Children Through Theraplay®

Thursday, June 8, 8:30 a.m. – 4:30 p.m.

This workshop will cover the fundamentals of Theraplay®, an attachment-enhancing model of play therapy. It is a treatment model that enhances attachment and trust between children and their parents – focusing on their strengths, thus building self-esteem for both. Theraplay tries to replicate normal parent/child interactions and is applicable to all ages and a wide range of emotional, behavioral and social difficulties. Most frequently, it is used in families where there are relationship and/or attachment difficulties including adopted, foster, stepfamilies, and those within the autistic spectrum. Through lecture, video and experiential activities, this workshop will include Theraplay theory, primary dimensions (structure, engagement, challenge and nurture) and related research. Attendees will have an opportunity to practice some Theraplay activities. Dress comfortably.

Presenter:
Dex Ray, PhD, LPC-S, RPT-S is a distinguished teaching professor in the child-wellness and family resources clinic at the University of North Texas. Dr. Ray has published more than 100 articles, chapters and books in the field of play therapy, specializing in research publications focusing on the process and effects of children-centered play therapy. She is author of Advanced Play Therapy: Essential Conditions, Knowledge, and Skills for Children, Practice and Child Centered Play Therapy; as well as coauthor of Group Play Therapy and Child Centered Play Therapy Research. Dr. Ray is current editor of the Journal of Child and Adolescent Counseling and former editor of the International Journal of Play Therapy. He is a founding board member and past president of the Association for Child and Adolescent Counseling. Dr. Ray has been the recipient of the Association for Humanistic Counseling Education, the Texas Outstanding Counseling Educator Award, the Outstanding Research Award for Association for Play Therapy, the Outstanding Research Award for Texas Counseling Association, and the Nancy Guillery Award for Outstanding Service and Contribution to the Field of Play Therapy from the Texas Association for Play Therapy.

The program at George Fox University is approved by the American Counseling Association for 6.0 CEUs. The program at George Fox University is approved by the American Counseling Association for 6.0 CEUs.

Extraordinarily Normal:
Applying Development to Play Therapy

Wednesday, July 6, 8:30 a.m. – 4:30 p.m.

Although therapists are familiar with historical developmental theories, they often struggle to apply these theories to clients and their systemic partners. This presentation provides a comprehensive picture of children at every age, including brain, physical, emotional, social, cultural and sexual development. Each age description provides a conceptualization of the child within current culture by providing discussion of relevant issues, such as growing up in a technologically savvy world.

This presentation will provide the therapist with a concrete understanding of children develop -mentally and how to assess developmental characteristics in child-centered play therapy. The presenter will show video clips of children in play therapy to demonstrate developmental principles. She will also discuss the integration of developmental knowledge with play therapies and therapeutic progress. Finally, this workshop will provide ideas and materials for how to use developmental information to tailor parent and teacher consultations to help them understand developmentally appropriate expectations for their children.

Presenters:
Dex Ray, PhD, LPC-S, RPT-S is a distinguished teaching professor in the child-wellness and family resources clinic at the University of North Texas.
