

Classroom Technology and Faculty Computers

Classroom Technology - We will complete our three-year update plan during the summer of 2012. Each classroom will include:

- projection,
- media playback (DVD combo),
- audio,
- document camera,
- controls,
- a teaching station to house these resources.

Faculty Computing - Each faculty is on a three-year rotation. They are given a laptop valued at approximately \$1200.00. Classrooms are designed to allow the use of these laptops for teaching without the need to transfer materials from an office computer to the classroom. When faculty get a new laptop, their returned machine is added to a pool of machines that are made available for adjunct faculty to check out for the semester, as well as other staff needs.
