### Shorthand for Notetaking - Notehand

- Some common forms of notehand include spelling every day words phonetically eg. says = saz, days = daz.
- Another notehand technique is to **develop abbreviations** for words that are used frequently in the course.
  - eg. Real Numbers - R
  - Natural Numbers - N

As long as you have the word spelled out correctly somewhere in your notes, you can refer back.

- Leave out the "the's, a's", etc.
- Use symbols when you can
  - & for and
  - B for but
  - X for except
  - etc.

- Leave out vowels.

- between =btwn
- among = amng
- patient =ptnt

- If there is a simple symbol, use it

- $1^\circ$  = primary
- $2^\circ$  = secondary
- ♥ = heart
- $\forall$  = for each

- $\therefore$  = therefore
- $\exists$  = there exists
- $\supset$  = such that
- $\in$  = is an element of

- PRINT key words. The eye and brain recognize print faster and you will remember it longer.
