Doctoral Employment Experience

- Jan. '09- Present Clinical Director for the George Fox Behavioral Health Clinic and assistant professor.
Supervised by Mary Peterson PhD, ABPP, Chairperson for the Graduate Department of Clinical Psychology.
501 Villa Rd., Newberg, OR 97132
503-554-2368

Clinical Director—oversee the operations of a low-cost, community mental health clinic. Provided supervision to doctoral graduate students. Clinic provided therapy and conducted psychological assessments for the Yamhill County Community.

Director of Internship Training—Conduct supervision, trainings and administrative duties for our APPIC accredited internship site. I also act as liaison with the

various agencies and supervisors connected with the internship program.

Assistant Professor—provide 13 hours of academic credit hours to doctoral graduate students. Courses most commonly taught are: Social Psychology, Geropsychology and Advanced Couples and Family Therapy.

- Sep. '07 – Aug. '10 Clinical Psychologist at Oregon State Hospital in Salem, OR. 503-945-2800
Clinical Psychologist—For two years I worked as the psychologist on an admissions ward dealing strictly with forensic patients that have been found unable to aid and assist. My duties included intellectual, neuropsychological and personality testing as well as treatment planning, and behavioral interventions. Worked as part of an interdisciplinary treatment team. In August of 2009 I transferred to the Forensic Evaluation Services division of the Oregon State Hospital. Duties included evaluating and writing reports regarding patients' fitness to proceed with their legal charges and testifying in court as needed.

Master's level Work Experience

- Aug. 2004- 2006 Behavioral Health Specialist, Providence Newberg Hospital, Newberg, OR
- Part of a 5-person On-Call psychological response team
 - Responsible for conducting psychological assessments to aid MD's in diagnosis and treatment.
- May 2005- Jun. 2006 Individual Therapist, George Fox University, Newberg, OR
- Weekly individual therapy with a 14 year old male in the community
 - Supervised by Wayne Adams Ph.D. ABPP at George Fox University
 - Treatment plan focus on enuresis, reading learning disability and processing his parents' separation

Aug. 2001- Dec. 2003 Child and Family Therapist, RiverBend Youth Center, Oregon City, OR (503) 656-8005

- Conducted individual and family therapy with adolescents at a residential psychiatric facility.
- Facilitated educational and process groups with the youth at the facility
- Facilitated educational and support groups for the parents of the youth
- Performed all needed case management for my clients utilizing resources in counties throughout Oregon
- Trained in the CPI method of non-violent crisis intervention and became certified as a QMHP

Research Experience

Dissertation Committee for: Mitchell, J. *Marital Dining Practice: Affecting Change in Marital Satisfaction*, (2012) Approved dissertation, submitted for publication.

Dissertation

Analysis of Different Types of Attentional Interference Compared to Working Memory

George Fox University, Newberg, OR

The intent of the study was to conduct a correlational study to compare response times from a typical Color-Word Stroop task to a “Stroop-like” Color-Block task. These response times were compared with 2 working memory tasks and one short-term memory to identify possible correlations. Results were unable to replicate the findings from the original color-block task and therefore an analysis of the critical variables that led to the original effect was conducted.

Chair: Christopher Koch, Ph.D.

Grants

2011 Providence Community Grants Council

Grant to fund Behavioral Health services for low-income, vulnerable, underserved and diverse communities in Oregon and Southwest Washington
